

The following 3D model was created in the SDS/2 steel detailing software package (<http://www.sds2.com/>) and exported in CIS/2 format (<http://www.cis2.org/>). From the CIS/2 file, a VRML97 model was created with the NIST CIS/2 to VRML Translator (<http://cic.nist.gov/vrml/cis2.html>). The VRML97 file was translated to the U3D format (<http://www.3dif.org/>). Adobe Acrobat 7.0 Professional was used to embed the U3D file (<http://www.adobe.com/support/salesdocs/1008536.html>) in a PDF version 1.4 file that was exported from a word processing system. The result was saved as a PDF version 1.6 file. Adobe Reader 7.0 or greater (<http://www.adobe.com/>) is required to be able to interact with the 3D model.

If the model appears black, click on it and then on the lamp in the toolbar that pops up.
